PROFESSIONAL SUMMARY

Computer Science undergraduate from UKM (National University of Malaysia) with practical experience developing mobile applications using Flutter/Dart, network administration using Cisco/CCNA certification, and database administration. Currently working on QuietSpace - a mobile application that uses artificial intelligence to help people manage their stress levels through the use of Firebase and Google Maps API. Passionate about creating user-friendly, technology based solutions to real-world problems. Trilingual in Arabic, English and Bahasa Melayu. Looking for opportunities in software development, network administration, or database engineering.

TECHNICAL SKILLS

Mobile & Software Development

- Languages & Frameworks: Flutter, Dart, Kotlin, Python, JavaScript, CSS, Bootstrap, HTML, Java
- Tools & Platforms: Firebase (Auth, Firebase, Storage), Google Maps API, Android Studio, VS Code, Visual Studio
- Version control with Git and GitHub (personal portfolio hosted at github)

Networking & Infrastructure

- Cisco Networking: OSPF, NAT, ACLs, VLANs, subnetting, Cisco Packet Tracer configurations
- CCNA-level knowledge: practical experience with Raspberry Pi systems
- Network topology design, troubleshooting, and documentation

Cybersecurity

- Ransomware forensics and analysis; network security protocol evaluation
- Social engineering awareness and mitigation strategies
- Understanding of security vulnerabilities and basic defensive practices

Other Tools & Skills

- Database Administration: SQL, database design and querying
- Design: Canva; Video Editing: Microsoft Clipchamp
- Languages: Arabic (Native), English (Fluent), Bahasa Melayu (Semi-Fluent)

PROJECTS

QuiteSpace AI Integrated Mobile App (2025-present)

- AI-Driven Predictive Capabilities: An intelligent mobile application designed to help students efficiently locate available study zones and predict crowding levels on campus
- Target Environment: Created specifically for the campus ecosystem to enhance student life, navigation, and academic support
- Modern Technical Stack: Developed as a cross-platform application using Flutter codebase, ensuring full compliance with both Android and iOS devices
- Advanced Integration: Features an optimized database architecture powered by Firebase, combined with Google Maps API for real-time to provide live location tracking and dynamic campus navigation

Hublot Inventory Management (2 months)

- Full-Stack POS System: Built a comprehensive web-based Point-of-Sale and inventory management application designed for luxury retail operations
- Secure Backend Architecture: Developed using LAMP stack (PHP, MySQL with PDO), featuring role-based access control (RBAC) and dynamic transaction handling
- Interactive UI/UX: Designed a responsive frontend with Bootstrap 3, utilizing glassmorphism aesthetics, dynamic light/dark mode theming, and integrated DataTables for streamlined data management

MedTime wellness mobile app (3 months)

- Health & Wellness Application: a native Android tracking app (Kotlin/Jetpack Compose) aligned with SDG 3 to monitor and improve patient medication adherence
- Dynamic State Management: Real-time UI updates using ViewModel and mutableStateListOf for secure, localized state sharing without relying on external databases.
- Advanced Navigation & UI: Implemented argument-driven routing across a 5-screen architecture and designed a Material You interface featuring custom time-pickers and intuitive, human-readable status indicators.

EDUCATION

UKM | Bangi, Malaysia

Oct/2023 – Oct/2027

Bachelor's in computer science with honours

Key Modules: Networking, Programming, Advanced Database, Discrete Mathematics, Statistics.

Dissertation: "Design and Development of a Student Life Digital Ecosystem to Enhance Campus Engagement and Academic Support at UKM" (In Progress).

KMC High School | Kajang, Malaysia

Oct/2019 – Jun/2022

High School Degree in Libyan Syllabus.

Subjects: Physics (A-), Maths (A-), Introduction in Computer Technology (A)

Progressive English Programme (PEP)

Nov/2022 – Feb/2023

Completed all 7 levels – Final Grade: A*

VOLUNTEERING

Cultural Tour Guide

Bee Gallery | Penang, Malaysia

Oct/2024 – Feb/2025

- Delivered educational tours to international and local tourists regarding the history, production, and benefits of local bee products
- Expanded global professional network and enhanced intercultural communication skills by engaging daily with diverse international visitors
- Utilized and strengthened multilingual capabilities, achieving near-fluent conversational proficiency in Bahasa Melayu

ACHIEVEMENTS

- Delegate, Asia Pacific Leaders Summit 2025 — selected as a representative among top student leaders across the Asia-Pacific region
- Participant, LOGIKA FTSM 2026 — competitive programming competition, Faculty of Information Science & Technology, UKM
- Attendee, MCMC Research Symposium — showcased/presented research in a national-level communications & technology forum
- Participant, SKDAM Clickventure Photography Programme — community engagement and creative leadership initiative
- Certificate of Participation, UN Human Rights Office — international engagement in human rights awareness (Aug 2024)

INTERESTS

Distance running (marathon participant) · Urban exploration · Photography · Continuous self-directed learning in software development and cybersecurity
